

ana::pro - Advanced Process Software

- extended software for easy operation of s::can monitoring systems
- display of up to 8 parameters
- configuration and calibration of s::can spectrometer probe, s::can ISE probe and s::can sensors
- operation of up to 8 s::can monitoring devices
- extended, comprehensive display and graphical visualization of measurement results
- simultaneous display of multiple absorption spectra, delta spectrometry
- offline data analysis
- access to memory of s::can spectrometer probe (logger mode)
- I/O configuration for additional gateways
- automatic synchronisation of result files to external PC
- freely definable mathematical formulas
- automatic functional check of complete s::can monitoring system

technical specification	
part number	S-03

to be used for	
con::stat	
con::necl	

taking the guesswork out of water and wastewater

Spectrometer Probes

Ionselective Probes

Sensors

Terminals
